

Woodinville ST Express service under evaluation

During peak hours, the proposed ST Express service would serve the future SR 522/I-405 Transfer Hub in Bothell before running on the I-405 express toll lanes to the Bellevue Transit Center, where riders could connect to light rail to Seattle or Redmond. During off-peak hours and on weekends, this route would serve the Transfer Hub in Bothell, where riders could connect to I-405 BRT or 522 BRT.

The proposed service is subject to public input and is not official until the Sound Transit Board approves the project to be built.

- Stride S3 Line
- Stride S2 Line (I-405 north corridor)
- Woodinville ST Express service under evaluation
- Westbound / eastbound stations

- Transfer hub
- City boundaries
